Kim CAARLS, Valentina MAZZUCATO, Djamilia SCHANS	Are transnational marriages unstable ? Comparing Ghanaian migrants in Europe and their non-migrant counterparts in Ghana
Tatiana EREMENKO	The role of siblings in international migration: competitors for a "ticket", members of the migration network or reason for migrating?

**16:00 Closing**

The **objectives** are threefold : (1) to enlight all mafe partners on the potential and limitations of our data, (2) to provide ideas to feed the working papers to be written within the FP7 work-packages and (3) to provide feedbacks to the authors for a potential improvement of their papers.

**Presenters are required to send their paper 1 week in advance**, in English or French (taking into account the discussant's language abilities).

**The presentations will focus on methodological issues** rather than on the results. They should insist on the difficulties you met, on how you overcame them or -alternatively- how you presented the limitations and justified that you could not overcome them. The presentations should include the following points:

- . present your research question(s) and hypothesis/ses (with no development on the lit' review)
- . how did you manage the data? Presentation of *your* dataset, discussion on the choice of the variables
- . stat' methodology
- . results and conclusion

**Discussants** are also asked to focus on methodological issues.

**Timing:** 15 mn per presentation + 10 mn for the discussant + questions

**Timing:** 15 mn per presentation + 10 mn for the discussant + questions
